Two Apps in One System

Staff App

- ✓ Live floor map (real-time)
- ✓ Table order management
- ✓ Send orders to kitchen
- ✓ Kitchen Display System (KDS)
- ✓ Reservation calendar
- ✓ Bill generation & split
- ✓ Loyalty settings & rewards
- ✓ QR code printing per table
- ✓ Café reports (8 sections)

Customer QR App

- ✓ Scan QR → open on phone instantly
- ✓ No app download required
- ✓ Quick Menu (no account)
- ✓ Play & Earn (loyalty account)
- ✓ Browse menu & place order
- ✓ Live order status tracker
- ✓ Earn points every order
- ✓ Play 5 mini-games for points
- ✓ Redeem rewards at checkout

Real-Time Everything

BCS Café uses WebSocket connections throughout the system. When a customer places an order from their phone, the kitchen display beeps and shows the new items instantly. The floor map table turns orange. The server sees "📱 Customer" badge on that table. No refreshing, no delays — everything updates live across all screens simultaneously.

FEATURES 01 & 02

Live Floor Map & Kitchen Display System

Floor Map

A visual grid of every table in the café. All staff see the same map in real time — table status changes the moment an order is placed or a bill is paid.

Free Table

Green — no open order. Click to start a new order and seat guests. Table turns occupied immediately.

Occupied Table

Red — has an active order. Click to view/add items, check item statuses, or generate the bill.

Customer QR Order

Orange — a customer placed an order from their phone. Items appear in kitchen automatically.

Layout Editor

Drag and position tables on the map to match your physical floor plan. Changes save instantly.

Table Order Features

- ✓ Add items with quantity & notes
- ✓ Send items to kitchen
- ✓ Transfer items to another table
- ✓ View item kitchen status
- ✓ Per-item modifier notes ("no sugar")
- ✓ Add more items at any time
- ✓ Merge two tables into one order
- ✓ Mark items as served

Kitchen Display System (KDS)

A full-screen dashboard for the kitchen. No paper tickets. No shouting across the counter. Every order update is live — and the system alerts kitchen staff with an audio beep the instant a new order arrives.

Order Cards

Each table's order appears as a card. Items show their status: Pending → Preparing → Ready → Served. Click any item to cycle its status.

Audio Alert

When a new order arrives in the kitchen (from staff or customer QR), the KDS plays an audio beep via the Web Audio API.

Customer Badge

Items ordered by customers via QR show a "Customer" badge — so kitchen staff know the source without asking anyone.

Real-Time Updates

When a server marks an item "Served," the customer's order tracker updates live. When all items are served, the table is ready for billing.

FEATURES 03 & 04

Smart Billing & Reservations

| Bill & Checkout

Service Charge

Apply a configurable service charge percentage to the bill. Shown separately on the receipt so the customer sees exactly what they're paying.

Bill Discount

Apply a flat or percentage discount at bill time. Useful for loyalty members, VIP customers, or table promotions.

Split Bill

Divide the total across any number of guests. Each guest sees their share. Each person can pay with a different method (cash, card).

Multiple Payment Methods

Cash, card, bank transfer — all supported. The checkout creates a Sale record, closes the order, and frees the table automatically.

| Reservations

A full reservation management system. See all bookings by date, manage no-shows, and convert any reservation into an active table order with one click.

- ✓ Create reservations: guest name, phone, date, time, table, guest count, notes
- ✓ Calendar view — browse reservations by any date
- ✓ Status tracking: Confirmed → Seated → Cancelled → No-Show
- ✓ One-click "Seat" — converts reservation directly into an active order on the floor map
- ✓ View upcoming reservations for the day on the floor dashboard

| Café Reports — 8 Sections

Every report supports Daily, Weekly, Monthly, and Yearly time periods.

#	Report	What You Learn
1	Revenue Overview	Total revenue, average per day, line chart over time
2	Peak Hours Heatmap	7-day × 24-hour grid — exactly when your café is busiest
3	Menu Performance	Top & bottom items, category revenue donut chart
4	Table Analytics	Revenue and occupancy rate per table
5	Kitchen Efficiency	Average preparation time per category
6	Reservations	No-show rate, fill rate, peak booking time slots
7	Customer Loyalty	New vs. returning customers, tier breakdown, top 10 leaderboard
8	Games Stats	Most played games, win rates, total points distributed

FEATURES 05 & 06

Customer QR App & Loyalty Points System

Customers scan a QR code on the table and order directly from their phone. No app download. No waiting for a server. And for loyal customers — every order earns points redeemable for free items.

Two Entry Modes

Quick Menu (Guest)

No account needed. Scan the table QR, browse the menu, place an order. The order goes directly to the kitchen and appears on the floor map. After ordering, the customer can play games for entertainment (no points).

Play & Earn (Registered)

Register with phone + password or sign in with Google. Every order earns points. Daily check-ins earn points. Games earn points. Redeem points for free items or discounts on the next order.

How Customers Earn Points

Action	Points Earned
First visit (welcome bonus)	+100 pts
Daily QR check-in	+10 pts / day
Order placed (per item × tier multiplier)	+10 pts per item
Rate your order (1–5 stars)	+5 pts
Play a game (once per day for points)	10–500 pts

Loyalty Tiers & Multipliers

Tier	Points Range	Order Multiplier	Status
Bronze	0 – 999 pts	×1.0	Starting tier
Silver	1,000 – 4,999 pts	×1.25	Regular customer
Gold	5,000 – 9,999 pts	×1.5	Loyal customer
Diamond	10,000+ pts	×2.0	VIP customer

Rewards Redemption

The café admin creates rewards in the settings panel (free item, % discount, flat discount). Before placing an order, the customer taps "Use Points" to choose a reward. The discount is applied automatically to their order total.

| Live Order Tracking

After placing an order, the customer sees a live status screen that updates as the kitchen prepares each item: **Received** → **Preparing** → **Ready** → **Served**. Once served, they are prompted to rate the order and play a game to earn more points.

FEATURE 07

5 Built-In Loyalty Mini-Games

Every registered customer can play one game per day to earn points. After that, games remain available for entertainment. This keeps customers engaged with your café app long after their coffee is finished.

Games Rule

Each game can be played **once per day** for points. After the daily play, the game switches to entertainment mode (unlimited plays, no points). This prevents abuse while keeping customers entertained. A "For Fun" badge appears on subsequent plays so customers always know.

Slot Machine

Three reels with coffee-themed symbols: ☕ 🍰 🍪 ★ 🎯 🥤. Spin to match symbols across the reels. Three matching stars = 500 pts. Three matching = 200 pts. Two matching = 50 pts. No match = 10 pts consolation.

10 – 500 points

Spin Wheel

8 animated spinning segments with prizes: 25 pts, 50 pts, 75 pts, 100 pts, 200 pts, Free Add-On, Double Order Points, 15 pts. A colorful animated wheel spins and lands on a random prize.

15 – 200 points + special prizes

Scratch Card

A 3×3 canvas grid. The customer drags their finger to scratch off the surface. Match 3 identical hidden symbols to win: Coin = 50 pts, Gem = 150 pts, Crown = 300 pts.

20 – 300 points

Mystery Box

Three face-down cards on screen. The customer picks one. It flips over to reveal a surprise: points (50/100/200/300/500) or a "50% off one item" special reward.

30 – 500 points

Trivia Challenge

3 multiple-choice questions set by the café admin (coffee trivia, menu facts, general knowledge). 30-second timer per question. 30 pts per correct answer + 20 bonus points for getting all 3 right (streak bonus).

30 – 110 points

GETTING STARTED

Live Demo Guide & Subscription Plans

| Demo 1 — Table Service Flow (3 min)

1 Open floor map

See all tables — green = free. Click Table 4 to open it.

2 Add items to the order

Browse menu categories → add 2 Lattes, 1 Croissant with note "extra hot"

3 Send to kitchen

Click "Send to Kitchen" → kitchen display beeps and shows items instantly

4 Kitchen marks items ready

Click items on KDS: Preparing → Ready → Served

5 Generate bill & checkout

Add 10% service charge → Split bill for 2 guests → Checkout → table turns green

| Demo 2 — Customer QR Order (2 min)

1 Scan the table QR code

Customer scans the QR printed at Table 4 — app opens instantly on their phone

2 Choose Play & Earn

Register with phone number → get +100 welcome points

3 Order from the menu

Browse categories → add Cappuccino + Cake → place order

4 Watch the floor map update

Table 4 turns orange immediately. KDS shows new items with 📱 Customer badge

5 Play a game after order

Customer plays Spin Wheel → lands on 75 pts → total balance: 195 pts

Cloud-Based — No Hardware Required

BCS Café runs entirely in the browser. Use any tablet for the floor map, any screen for the kitchen display, and any device for reports. The customer QR app needs zero installation — it opens in the phone's browser. Setup for a new café takes less than 30 minutes.
