THE BCS PLATFORM

One platform. Every business function you need.

BCS is a cloud-based business management platform built for Lebanese retail stores, cafés, and restaurants. Unlike generic POS systems, BCS includes every module you'd normally pay for separately — from AI procurement intelligence to a gamified customer loyalty app.

6

Platform Modules at a Glance

Retail POS
Smart checkout, barcode scanning, split payment, holds, returns, receipt printing, offline mode.

Inventory & Batches
FIFO batch tracking, expiry alerts, stock logs, supplier management, AI reorder engine.

AI Intelligence
Gemini-powered offer suggestions and reorder lists based on real sales velocity data.

Online Store
Auto-generated storefront, delivery orders, cart injection, Telegram driver alerts.

Café System
Floor map, table orders, kitchen display, reservations, split bill, QR customer app.

Gamified Loyalty
5 mini-games, loyalty tiers, points system, rewards redemption, QR table ordering.

Who Is BCS For?

Business Type	What BCS Gives Them
 Supermarket / Mini-market	Full POS + FIFO inventory + AI reorder + delivery + VAT compliance
 Café / Coffee shop	Floor map + KDS + reservations + gamified loyalty QR app
 Restaurant	Table management + kitchen display + split bill + customer ratings
 Retail + Café combo	Both modules in one system, one login, one subscription
 Delivery business	Online storefront + order management + Telegram driver alerts
 Multi-branch business	Centralized SuperAdmin panel — manage all branches from one screen

COMPETITIVE ADVANTAGE

Why BCS beats every other POS in the region

Arabic / English interface	✓	✗	✗	Partial	Partial
Offline mode	✓	✓	✗	Partial	✗
Multi-store SuperAdmin panel	✓	Extra \$	Extra \$	✗	✓
Local pricing (no USD trap)	✓	✗	✗	✗	✗

3 Unique Differentiators

AI Business Intelligence

No other regional POS gives you AI-generated reorder lists and promotional offers based on your own stock velocity and expiry data — built in, no extra cost.

Gamified Loyalty App

Customers scan a QR, order from their phone, earn points, and play 5 games. No other POS in Lebanon or the region offers anything like this.

End-to-End Delivery

Auto-generated storefront + cart injection + Telegram driver alerts. A complete delivery pipeline — not a bolt-on add-on.

MODULE 01

Retail POS & Business Intelligence

**Smart Checkout**

Barcode scan, category grid, quick search, product variants. Cashier completes a full transaction in under 15 seconds. Hold & resume, offline mode.

**Payment Engine**

Cash, Card, Bank Transfer, Pay Later, Cash on Delivery, Split Payment. Divide one sale across any combination of methods.

**FIFO Batch Inventory**

Every stock-in creates a tracked batch with expiry date and cost. Sales auto-deduct from the soonest-to-expire batch first.

**Profit & Loss Reports**

Revenue, COGS, refunds, gross margin. Per-product breakdown with margin % per SKU. Filter by any date range.

**Shift Management**

Open/close with denomination counting. Auto-calculates expected cash. Variance detection. Per-payment-method breakdown.

**Customer CRM**

Profiles with purchase history, credit balances, total spent. Pay Later ledger with payment tracking per account.

Lebanese VAT Compliance (11%)

Per-product VAT exempt toggle. VAT computed only on non-exempt items. Full receipt disclosure with subtotal, VAT amount, and VAT registration number — as required by Lebanese law.

Audit & Security

- ✓ Every action permanently logged
- ✓ Sale, void, return audit trail
- ✓ Manager PIN for void protection
- ✓ Remote force-logout any device

- ✓ Login/logout with IP & device
- ✓ Stock adjustment audit trail
- ✓ Per-user device session control
- ✓ Configurable max devices per user

MODULES 02 & 03

AI Business Intelligence & Online Delivery System

AI Intelligence — Powered by Google Gemini

The AI engine analyzes your real sales data — velocity, batch expiry, margins — and makes specific recommendations. Not generic tips. Actual product names, actual quantities, actual profit calculations.

AI Offer Suggestions

- ✓ Identifies products expiring before they sell
- ✓ Flags slow-moving & dead stock
- ✓ Suggests: % discount, bundle, buy X get Y
- ✓ Never suggests an offer below margin
- ✓ Shows urgency (High/Medium/Low)
- ✓ Predicts expected impact in units

AI Reorder Suggestions

- ✓ Calculates days of stock remaining per product
- ✓ Priority: Urgent (under 7 days)
- ✓ Priority: Normal (7–20 days)
- ✓ Priority: Low (20–30 days)
- ✓ Exact suggested quantities
- ✓ Total estimated cost per order
- ✓ Save as Purchase Order, track to delivery

Online Store & Delivery Module

Activate in one click. BCS creates a public-facing storefront with your store's URL automatically. Customers browse and order. The delivery flow is fully automated — from order to driver dispatch.

Auto Storefront

Your store URL is live the moment you activate. Product catalog with images, search, categories. Mobile-first responsive design. Share via WhatsApp or print QR code.

Cart Auto-Injection

When admin accepts an online order, the customer's cart automatically appears in the cashier's POS screen — no retyping, no errors.

Telegram Driver Alert

When order dispatches, driver gets a Telegram message: customer name, full address, item list, total, and payment method.

Live Order Tracking

Customer sees real-time status: Pending → Accepted → Out for Delivery → Delivered. No phone calls needed from either side.

MODULE 04

Café Management & Gamified Loyalty

Live Floor Map

Visual table grid. Real-time status: Free (green), Occupied (red), Customer QR order (orange). Drag tables to match your physical layout.

Kitchen Display (KDS)

Full-screen kitchen dashboard. Audio beep on new orders. Items cycle: Pending → Preparing → Ready → Served. "📱 Customer" badge on QR orders.

Reservations

Create bookings with name, date, time, table, guest count. Calendar view. One-click "Seat" converts reservation to active table order.

Split Bill

Split any table's bill across any number of guests, each paying a different method. Service charge, discount, and split — all in one checkout flow.

Customer QR App — 5 Games

Customers scan the table QR, order on their phone, earn loyalty points, and play games. This is the engagement engine that keeps customers coming back and spending more.

Slot Machine

3 reels, coffee symbols. 3-match = 500 pts. Up to 500 points per play.

Spin Wheel

8 animated segments. Points + special prizes (free add-on, double points).

Scratch Card

Canvas drag-to-scratch. Match 3 symbols on a 3×3 grid. Up to 300 pts.

Mystery Box

Pick 1 of 3 cards. Reveal pts or "50% off one item" special reward.

Trivia Challenge

3 MCQ, 30s timer. 30 pts/correct + 20 streak bonus for perfect score.

Loyalty Tiers

Bronze → Silver → Gold → Diamond. Diamond customers earn 2× points on every order.

MODULE 05

SuperAdmin Panel — Manage All Your Clients

The SuperAdmin is the platform operator. From one dashboard, manage every store, every user, every subscription — across the entire client base.

Platform Overview

Total stores, active stores, total revenue across all clients, store growth chart, plan distribution, and stores expiring soon — all on one screen.

Store Management

Create, enable/disable, delete stores. Toggle Café module. Toggle Online Store. Set plan, expiry, user limits, product limits, monthly price.

User Management

Create cashiers and admins per store. Reset passwords. Force logout any device remotely. Set max concurrent device sessions.

Impersonation

Log in as any store's admin with one click — for demos or support — without knowing their password. Session is isolated and audited.

Store Cloning

Clone an existing store's categories and settings into a new store — ideal for franchise clients. New admin credentials set during clone.

Bulk Notifications

Send a notification to one store or all stores at once. Extend plans for multiple stores in one action. Bulk enable/disable stores.
